Summary

Cybersecurity and Digital Forensics professional (B.Tech, MIT-WPU) with hands-on experience in offensive security, adversarial simulation, threat detection engineering, and security analysis. Built SentinelSOC — a full-stack SIEM and SOC Operations Simulator featuring real-time log ingestion, behavioral threat detection, IOC analysis, and incident escalation workflows. Developed a Purple Team Docker Lab for attack simulation, reconnaissance, and detection validation across Linux-based environments. Familiar with offensive security concepts including privilege escalation, lateral movement, vulnerability assessment, and Active Directory attack methodologies. Experienced with tools such as Nmap, Burp Suite, Wireshark, Scapy, ELK Stack, and Docker. Completed a 6-month internship at the Regional Forensic Science Laboratory (RFSL), Pune, focused on forensic analysis and cybersecurity investigations. Passionate about Red Teaming, ethical hacking, attack simulation, and offensive security research.

EDUCATION

MIT World Peace University

B.Tech, CSE Cyber Security & Forensics — CGPA: 7.56

2023 – Present

Pune, India

Uka Tarsadia University

Diploma in Computer Engineering — CGPA: 8.75

2020 – 2023

Gujarat, India

TECHNICAL SKILLS

Security & SOC: Security Operations Center (SOC) Operations, Security Monitoring, Alert Triage, Incident Monitoring, Threat Hunting, Incident Response, Log Analysis, Vulnerability Assessment, Risk Analysis, SIEM Workflows, Threat Detection Engineering, EDR Concepts, IDS/IPS Concepts, MITRE ATT&CK Mapping, Behavioral Analysis, Security Documentation, Compliance Basics, Playbook Development, CVSS Scoring

Networking & Systems: TCP/IP, DNS, HTTP/HTTPS, VPN, Firewalls, Packet Analysis, Endpoint Security, Linux, Windows, Windows Event Logs

SIEM & Security Tools: ELK Stack, Splunk (Learning), Wireshark, Nmap, Burp Suite, Scapy, Docker, Git

Programming & Technologies: Python, SQL, Flask, REST APIs, Bash, SQLite, Pandas, Regex, JavaScript

Log Sources & Analysis: Linux auth.log, Windows Event Logs, Nginx/Apache Logs, Threat Correlation, Security Event Analysis

EXPERIENCE

Regional Forensic Science Laboratory (COE)

Scientific Assistant Intern

Jul 2025 – Jan 2026

Pune, India

- Assisted in acquisition, preservation, and forensic analysis of digital evidence from multiple devices.
- Performed artifact extraction, log review, and incident timeline reconstruction during forensic investigations.
- Maintained investigation documentation, evidence handling records, and proper chain-of-custody procedures.
- Contributed to artifact correlation and forensic reporting during cybersecurity and digital evidence examinations.

PRASUNET Pvt. Ltd.

Cyber Security Intern

Aug 2024 – Sep 2024

Remote

- Worked on cybersecurity projects involving packet monitoring, traffic analysis, and threat detection using Python.
- Performed basic vulnerability assessment and network security analysis using offensive security methodologies.
- Worked with reconnaissance and packet inspection concepts using networking and security analysis tools.
- Developed utilities related to suspicious traffic analysis and secure coding practices.
- Documented findings and maintained technical project repositories using GitHub.

Shalaka Connected Devices Systems Pvt. Ltd.

IoT Intern

Apr 2024 – Nov 2024

Pune, India

- Assisted in development and testing of IoT cloud solutions for connected devices.
- Worked on BLE-based monitoring dashboards for device tracking and visualization.
- Participated in integration testing, deployment support, and technical documentation.
- Collaborated with teams to troubleshoot device communication issues.

Atul Ltd.

Database Administrator Intern

May 2022 – Jun 2022

Valsad, India

- Assisted with SQL backup management and database monitoring tasks.
- Reviewed query logs and supported access control management.
- Helped optimize database operations and maintain system reliability.

PROJECTS

DDVM: Purple Team Lab | Docker, ELK Stack, Linux

GitHub

- Built a containerized Purple Team lab environment with intentionally vulnerable systems for adversarial simulation and Red Team exercises.
- Performed reconnaissance, attack simulation, threat hunting, and detection validation across Linux-based environments.
- Integrated ELK Stack for centralized log collection, attack visibility, and security monitoring workflows.
- Simulated offensive security scenarios to validate detection rules and behavioral threat analysis pipelines.
- Developed deployment scripts for reproducible cybersecurity lab environments across Linux and Windows systems.

SentinelSOC: SIEM & SOC Operations Simulator | Python, Flask, SQLite, Pandas, FPDF, Regex

GitHub

- Engineered a full-stack SOC simulator featuring a real-time ingestion pipeline that normalizes heterogeneous logs from Linux (auth.log), Windows Event Logs, and Web (Nginx/Apache) sources.
- Developed a multi-layered SIEM detection engine implementing Regex-based threat detection, Threshold-based brute-force detection, and Unique Count-based port scan identification.
- Implemented behavioral context-awareness using SQLite-based historical baselines to automatically escalate alert severity for persistent attackers and anomalous traffic spikes.
- Simulated SOC ticket lifecycle management, SIEM alert triage, incident escalation workflows, and analyst investigation procedures within a SOC environment.
- Performed IOC enrichment, log correlation, and behavioral analysis to reduce false positives during simulated attack investigations.
- Built an interactive Flask dashboard for security monitoring, incident orchestration, automated IP blocking simulations, and PDF/Excel report generation.
- Mapped simulated attack behaviors to MITRE ATT&CK techniques for improved threat visibility and investigation workflows.

MacHeimdall: macOS Forensics Tool | *Python, Pandas* | GitHub

- Developed a forensic analysis tool for reviewing macOS system logs.
- Implemented log parsing and anomaly detection features.
- Added integrity verification using SHA-256 hashing.

CERTIFICATIONS & ACHIEVEMENTS

- Google Cybersecurity Professional Certificate
- Digital Forensics & Incident Response (CyCube)
- Indian Copyright Registration – STEGOCRYPT USING QR CODE
