

ABHISHEK DEVENDRA LIMAYE

Cybersecurity & Digital Forensics | +91 7779016999 | abhishek.d.limaye@gmail.com | linkedin.com/in/abhishekdlimaye | github.com/limayeabhishek

PROFESSIONAL SUMMARY

Aspiring SOC Analyst and DFIR practitioner with hands-on experience in forensic evidence handling, log analysis, and security event investigation. Skilled in threat detection workflows, artifact extraction, and correlating host-based indicators across systems. Experienced in structured case documentation, chain-of-custody procedures, and assisting law enforcement with actionable findings. Strong foundation in Python scripting, SIEM-based alert triage, vulnerability assessment, and system behavior analysis on Linux, Windows, and macOS. Passionate about blue-team operations and progressing into full-scale DFIR roles.

EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2023–Present	B.Tech, CSE Cyber Security & Forensics	MIT World Peace University	7.32
2020–2023	Diploma in Computer Engineering	Uka Tarsadia University	8.75

PROFESSIONAL EXPERIENCE

Cyber Forensics Intern — Regional Forensic Science Laboratory (RFSL)

• Assisted in acquisition, preservation, and analysis of digital evidence across computers, mobiles, and storage devices • Maintained strict chain-of-custody compliance ensuring evidentiary integrity • Performed basic log review and supported forensic officers in preparing case documentation
Pune, India

IoT Intern — Shalaka Connected Devices Systems Pvt. Ltd.

• Developed and tested BLE-based IoT modules, improving device connectivity and performance • Conducted firmware validation, sensor calibration, and data consistency testing • Gained exposure to secure device communication practices and identifying minor anomalies during testing
Pune, India

Database Administrator Intern — Atul Pvt. Ltd.

• Managed SQL backups, automation, and database performance optimization • Maintained role-based access permissions and structured data workflows • Monitored query logs for irregular access patterns and followed secure data handling practices
Valsad, India

TECHNICAL SKILLS

SOC & Blue Team Skills

Log Analysis • Event Correlation • Alert Triage • Threat Hunting (Basic) • MITRE ATT&CK Mapping • Incident Documentation

Forensic Tools

Cellebrite • MOBILedit • Oxygen • Magnet • FTK • EnCase • Atola • Autopsy • AmpedFIVE

Security Tools

Wireshark • Nmap • OpenVAS • Burp Suite • Metasploit • OSSEC • Snort

Programming & Automation

Python • Bash • Forensic Scripting • Data Parsing • Log Normalization

Core Competencies

Digital Forensics • Evidence Preservation • SIEM Concepts • Network Security • Incident Response • File System Analysis • Timeline Generation

PROJECTS & RESEARCH EXPERIENCE

MacHeimdall – macOS Forensic Analysis Tool

Developed a full forensic triage tool for macOS that analyzes unified logs, detects authentication anomalies, identifies brute-force attempts, and generates forensic-ready HTML reports with SHA-256 evidence manifests.

AETHER – Azure Cloud Forensics Automation Toolkit

Developed an automated DFIR tool for Azure that performs read-only VM snapshot acquisition, extracts Activity/Security/NSG logs, correlates events into a unified forensic timeline, and generates defensible chain-of-custody and evidence reports.

Zero-Knowledge Vault

Created a secure Java-based encrypted vault using hybrid cryptography with anti-bruteforce lockout and secure file workflows.

Ethical Trojan Simulation

Built a controlled Python-based simulation demonstrating data exfiltration and behavior-based detection for cybersecurity lab purposes.

ACHIEVEMENTS & RECOGNITIONS

• Indian Copyright Office Registration – **STEGOCRYPT USING QR CODE**: Research on hybrid cryptographic–steganographic method for secure data transmission.

CERTIFICATIONS

• Google Cybersecurity Professional Certificate – Linux, Python, SIEM, IDS/IPS, Vulnerability Management, IR workflows.
